Portfolio

EDUCATION

European University of Bangladesh

2022

Bsc in Computer Science and Engineering

Dhaka, Bangladesh

Udacity

2018

Data Foundation Nanodegree

Emeryville, California, USA

Satkhira Polytechnic Institute

2018

Diploma in Engineering in Computer Science and Engineering

Satkhira, Bangladesh

PUBLICATIONS

A deep learning approach for brain tumor detection using magnetic resonance imaging

International Journal of Electrical and Computer Engineering (IJECE) - 2022-10-25

TECHNICAL SKILLS

OS: Linux, Mac, Windows

Languages: Python, JavaScript, SQL

Frontend: HTML, CSS, Bootstrap, JavaScript, React

Backend: Django Rest Framework (DRF), FastAPI

Database: Postgres, PGvector, Pinecone, Chromadb, Supabase

Generative AI: Langgraph, Langchain, CrewAI, Agency-Swarm, RAG, Context Engineering, Fine-tuning

ML/DL: Scikit-learn, Keras, Tensorflow, NLTK, Spacy, Opencv, Numpy, Pandas, Matplotlib, Seaborn

Developer Tools: Cursor, Vibe Engineering, VS Code, Spyder, Jupyter Notebook, Git, Postman

Cloud: Docker, Github Actions, AWS EC2

WORK EXPERIENCE

Recom

01 2025 – Present

AI Engineer

Dhaka, Bangladesh

- Designed and deployed Agentic Rag and tool calling Agent for HRMS software.
- Designed and deployed full-stack agentic systems for HR technology solutions.
- Developed AI-driven payroll automation systems, integrating gen AI to streamline payroll management.
- Deployed and maintained end-to-end agentic platforms on AWS, ensuring scalability and high availability.

Individual Development Plan Agent | OpenAI API, Langgraph, Fastapi, PostgreSQL, Angular, AWS

- A full-stack agentic system that helps users advance from their current role to their desired position.
- [View Demo here](#)

Job Description Agent | OpenAI API, Langgraph, Fastapi, PostgreSQL, Angular, AWS

- An AI platform that automates and standardizes company-specific job descriptions.
- [View Demo here](#)

Appsinception

11 2024 – 12 2024

Software Engineer

Remote

- Developed RESTful APIs with Django Rest Framework (DRF) for seamless backend functionality.
- Implemented multi-agent systems with Agency-Swarm, enabling efficient creation and management of tools, agents, multi-agent teams, and widgets via the API.
- Conducted rigorous debugging and testing to ensure API reliability, performance, and smooth deployment.

AI Agent Widget | OpenAI API, Agency-Swarm, DRF, PostgreSQL

- An Agentic platform enabling users to sign up, create tools, agents, teams, and widgets, integrate payment systems, and generate embed codes for deploying chatbots seamlessly.
- [Live site here](#)
- [Listed on codester](#)

AriSaf Tech Ltd

04 2023 – 10 2024

Jr AI Engineer

Dhaka, Bangladesh

- Engaged with ARChat, a sophisticated LLM chatbot, contributing to its development and optimization.
- Performed various AI Proof of Concept (PoC) initiatives to explore and showcase cutting-edge tech feasibility.
- Engaged in research and development focusing on Natural Language Processing (NLP) for AI projects.
- Conducting extensive R&D to integrate emerging technologies and drive product innovation.
- Building and managing APIs with DRF and FastAPI for optimized backend services.

ARChat | [Openai API](#), [Langchain](#), [SupabaseDB](#), [Fastapi](#)

- * A RAG-based platform enabling users to create multiple chatbots, each with its own dedicated knowledge base for enhanced functionality and customization.
- * [Live site here](#)

Headblocks

04 2019 – 05 2020

Junior Machine Learning Engineer

Dhaka, Bangladesh

- Collaborated on a team project leveraging IBM's WKS, under the supervision of IBM professionals.
- Led research and development for Named Entity Recognition (NER) tailored for resumes.
- Developed a sophisticated model capable of identifying various entities within resumes.
- Processed and annotated a large resume corpus to train and refine the NER model.

OPEN SOURCE PROJECTS

LangGraph Node-Level Streamer  | [Langgraph](#), [Python](#)

- A PyPi package that streams at node level at langgraph
- Supports tool calling while streaming

SQL-RAG Combined Agent FastAPI Backend  | [Langgraph](#), [fastapi](#), [postgresql](#), [pgvector](#), [docker](#)

- A production ready Sql combined agentic rag with fastapi backend

SQL Agent FastAPI Backend  | [Langgraph](#), [fastapi](#), [PostgreSQL](#), [SQLite](#), [docker](#)

- A production ready SQL Agent with fastapi backend

Agentic RAG FastAPI Backend  | [Langgraph](#), [fastapi](#), [postgresql](#), [pgvector](#), [docker](#)

- A production ready Agentic RAG with fastapi backend

AutoHR  | [Llama3.1](#), [Langgraph](#), [CrewAI](#), [Langchain-tools](#), [GmailAPI](#), [Python](#)

- An autonomous multi-agent system to automate most of the workflow of an HR Persona
- Can automatically pull, research, and draft email responses in gmail

AI Study Buddy  | [Openai API](#), [Langchain](#), [Chroma DB](#), [Streamlit](#), [Python](#)

- A Question Generation and answering platform for students and teachers
- Given any number of PDF AI will generate questions based on the documents provided
- User can submit URL, Youtube video link, along with pdf documents
- User can select questions and AI will generate answers to the question from the documents
- User can see the source from which the question has been answered
- User can generate a summary of the document

[Live site here](#)

Chatbot AI Backend  | [GPT-3.5Turbo16k](#), [langchain](#), [fastapi](#), [PineconeDB](#), [Python](#)

- An API for the backend of a rag chatbot
- User can upload docx,pdf,pptx document and chat with it

Resume Categorizer  | [numpy](#), [pandas](#), [matplotlib](#), [seaborn](#), [scikit-learn](#), [Python](#)

- A ml model that chat categorize resumes to different sub-domains (ex. HR, ARTS, etc)

AriSaf Chatbot  | [GPT-3.5](#), [Langchain](#), [FaissDB](#), [Streamlit](#), [Python](#)

- A chatbot for the AriSaf Tech website using the knowledgebase from the site urls

RealEstate Backend  | [Django Rest Framework](#), [Python](#)

- An API for the backend of a real estate website

Book Recommender System  | [Numpy](#), [Pandas](#), [Machine Learning](#), [Streamlit](#), [Python](#)

- User can select a book name from a drop-down list
- Model will recommend 5 books

[Live site here](#)

Movie Dataset 2023  | [Numpy](#), [Pandas](#), [Jupyter Notebook](#), [Python](#)

- A dataset of all movies till 2023
- Can be used for EDA, Recommendation Systems, Data Analysis, etc..

Covid 19 Detector  | [Deep Learning](#), [Django](#), [Python](#), [Heroku](#), [HTML](#), [CSS](#)

- Given a chest X-ray image of a person the system will detect covid 19
- Model build and trained using Deep Learning architecture
- UI is build with python django framework
